

CH 8' RETROFIT KIT

DESCRIPTION

This retrofit channel kit is designed for easy conversion from old inefficient T12 lamps to the new energy efficient T8. It is designed to fit all existing 4" to 4.25" width bodies on 4' or 8' channel fixtures.

Installation: Kit comes with installation instructions and all parts and wiring needed to easily retrofit your old bodies with new ballasts, lampholders, socket plates, and covers.

CONSTRUCTION

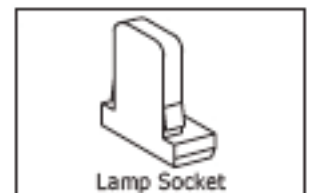

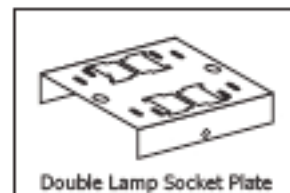

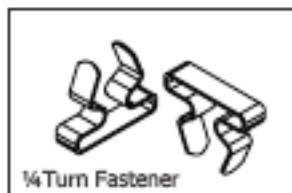

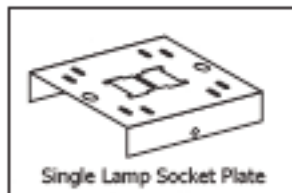

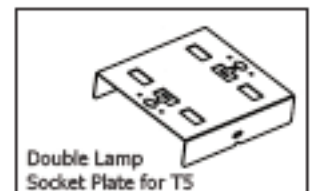

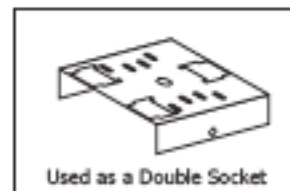

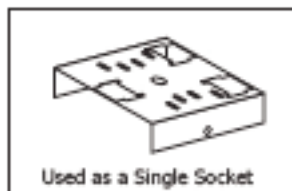

Socket plates and covers are Die-formed 21-gauge white steel.

ELECTRICAL

120v, 60Hz, solid state electronic ballast, direct wire, UL/CUL listed for dry or damp locations.

OPTIONS

Add "D" for damp location listing
Add "CS" for chain hanging set
Add "277" for 277v wiring
Add "L" for low ballast factor rebate-eligible fixture
Add "H" for high ballast factor
