

HIGHBAY T5 & T8 SERIES

Specular Silver Reflector Optional Wire Guard

DESCRIPTION

Shallow lightweight suspended ceiling fixture with unlimited uses as a substitute for HID highbay and lowbay applications in warehouses, retail, greenhouses, and more. T5 high-output or T8 high lumen fluorescent bi-pin tubes in 4 and 6 tube sizes.

Mounting: Fixtures designed for surface, stem, chain, or cable mounting from ceiling. Can be connected in continuous rows.

CONSTRUCTION

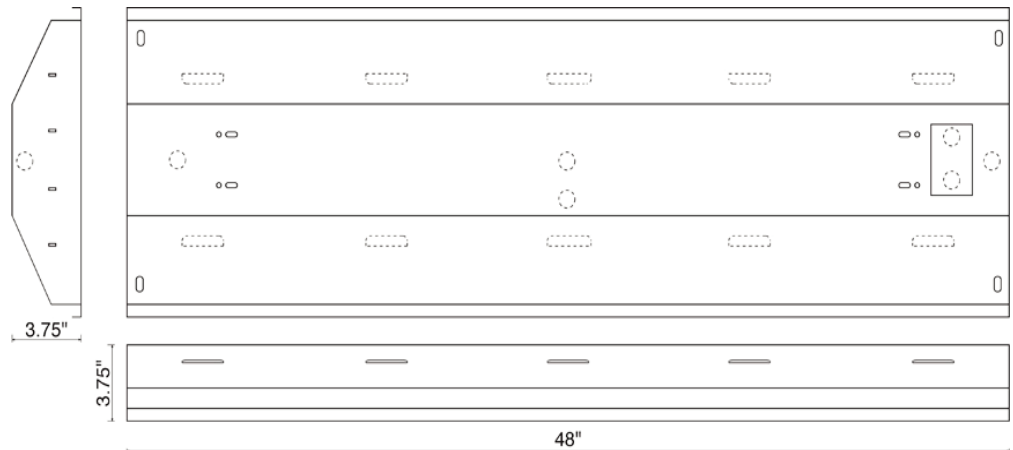

Housing: Die-formed 21-gauge cold rolled steel with baked white enamel finish and die-formed, high reflectance specular aluminum reflector.

ELECTRICAL

Completely wired with high power factor T5 or T8 electronic ballasts, ready to direct wire install to standard junction box with whip or flex cord. 120v, 60Hz, UL/CUL dry and damp location listed.

OPTIONS

Add "277" for 277v ballast
Optional wire face guard also available: 11GA heavy steel wire welded in 2" x 2" protective grid, held in place with combination hinges/snap clips on both sides
WE-Energies Rebate Eligible
